INTEGRATED DOORS AND SMOKE & FIRE CURTAINS by Door Systems

Door Systems "Escape Room" Company Retreat

What is an Escape Room?

In escape rooms, groups of 3-8 players voluntarily get locked into a physical room. By exploring the space, discovering hints, following traces, and solving puzzles they try to escape within a restricted amount of time. The idea is rooted in different game genres like point-and-click adventures, puzzle hunts, theme parks, and live-action role playing games. Escape rooms are games as they involve a clear goal (escaping the room), a

rule-based means of achieving the goal (solving puzzles) and a lousy attitude (the whole team agrees on pretending they are actually trapped).

To create a winning team, collaboration, communication, and teamwork must be taught and constantly improved upon. Team building is important for any organization and doesn't need to be in a room with white boards and markers. **So we took our team building activity to the next level with an Escape the Room challenge – it took communication, trust, and teamwork to get out in time!**

Teamwork

Just like in the workplace, the Escape Room requires everyone to work together and communicate if they want to get out in time.

Problem Solving

These puzzles are guaranteed to push you, consider different ideas and work together to find the solutions.

Time Management

We face deadlines every day in work and life. Team building in an Escape the Room challenge forces teams to work together – quickly.

Door Systems is the only company to provide code compliant integrated fire doors and fire protective smoke curtains that offer superior aesthetics, high performance and up front cost savings while bringing long term value to the customer.

DSI 600 ELEVATOR SMOKE CONTAINMENT SYSTEM

A cost effective and architecturally pleasing solution to elevator shaft smoke protection. A proven system that meets all code requirements.
