INTEGRATED DOORS AND SMOKE & FIRE CURTAINS

by Door Systems

Introducing the Next Generation of Integrated Doors

Conventional doors only account for about one and a half percent of construction dollars. But they are responsible for a full 20 percent of owner problems. This is because conventional doors contain parts from as many as 15 different manufacturers. Each part is sourced separately, then put together in the field. The Syntégra™ Door system offers a better way.

FEATURES FOR THE SYNTÉGRA™ DOOR:

- Can be custom-fitted to virtually any opening, in new or retrofit applications.
- Our design eliminates traditional vertical rods, astragals, coordinators, floor strikes and flush bolts, for better looks and unbeatable reliability.
- Fire ratings for up to 8'-6" x 10'-0" openings
- Available in top-latch or top and bottom latch configurations; no side latch or strike exposed to tampering
- Friction-limiting projection type latching minimizes the top strike view and minimizes the top door notch

- Suitable for pairs or single doors, exterior or interior
- Escutcheon-free clutched exterior lever and cylinder options available as needed
- Flush panic and push pad hardware
- Robust mechanisms and electrical functions are designed to operate in the most demanding applications

Better Aesthetics, Better Performance, Better Price
